

GLOBAL KERATIN TREATMENT AFTERCARE

To ensure your Global Keratin Treatment lasts and you get the best straightening possible, we recommend the following aftercare:

FOR THE FIRST 4 DAYS

What you CAN DO:

- *You do not want to wear your hair down for at least 4 days to allow the product to settle in your hair.*
- *Do use a blow dryer or flatiron as needed, (in case hair gets wet during the first four days.)*
- *Do wear a silk scarf to pull your hair away from your face.*
- *Do use a shampoo without Sodium-Chloride (Sulfate-Free) on your hair **at all times**. Normal shampoo can cause the keratin to breakdown and, therefore, your treatment may not last as long. Sulfate-Free products can be purchased in The Amber Room Salon.*

What you CANNOT DO:

- *Don't wash your hair for the first time.*
- *Do not tie your hair into a ponytail.*
- *Do not use hair clips.*
- *Do not place your hair behind your ears.*
- *Do not exercise or sweat.*
- *Do not use hair bands.*
- *Do not use your glasses to hold your hair back.*
- *Do not use sprays, gel or mousses.*
